

“MOVE” SUPPORT

Move support includes the following:

1 Software Management

Reminder:

- Hardware devices not detected during initial boot sequence can not be supported.
- Only USB keys provided by Mandrakesoft are officially supported.
- Support can be extended only to software applications included in the move CD.
- Support for hardware devices evolves from one release to another one.

2 Video Configuration

- Basic X11 configuration with a single monitor is detected by our configuration tool XFDrake:
 - 3D acceleration with NVIDIA® and ATI™ cards supported by Move products
 - 800x600 and 1024x768 resolutions
 - 16-bit color setup
- VESA mode and frame buffer support

3 Printing System

- Configuration of compatible local printer with PrinterDrake tool (USB/Serial)
- Printing on compatible network printer with PrinterDrake tool
- Printing options configuration
- Printers shared under Windows®

4 Hardware

- Standard keyboard configuration (USB or PS/2)
- Standard mouse configuration (USB or PS/2)
- Configuration of PCI or integrated network cards compatible with Move products
- Configuration of IDE or SCSI CD-writer (connected to a controller compatible with Move products. In order to burn Cds, you need a CD-Burner and a CD/DVD player)
- Configuration of USB or Firewire devices compatible with Move products

5 Internet Connection

- Configuration of RTC Internet connections except winmodem
- Configuration of ADSL Internet connections on PCI card or ADSL modem compatible with Move products

6 Network Clients

- Network card configuration (max. 2)
- NVIDIA®nForce™ 2 drivers configuration
